WELCOME MESSAGE

Dear Colleagues and Friends,

It's a real pleasure to welcome you to Dubai to the 12th Annual Middle East Orthopaedic Paediatric Society (MEPOS) Conference. The 2025 annual meeting brings together the experience of surgeons, allied health professionals, and researchers from across the region and around the world. The invited Speakers will share their unique and remarkable expertise in the fields of congenital, acquired, and neuromuscular paediatric orthopaedic conditions.

Over the next few days, we'll explore an exciting program covering neuromuscular orthopaedics, gait analysis, congenital limb differences, spine deformities, and advanced reconstructive surgery. The contribution of free paper sessions showcase the rich diversity of ideas and experiences that make our community so driven by the highest standard of care.

This year's hands-on workshops promise to be especially engaging featuring sessions on gait analysis, surgical techniques on dry bone, and the first dedicated paediatric hand splinting workshop in the region. These practical learning opportunities embody the spirit of MEPOS: collaboration, innovation, and shared growth.

Beyond the lectures and discussions, MEPOS continues to serve as a true community of purpose, a place where mentorship, friendship, and professional exchange come together to advance our shared mission. Together, we continue to raise the standard of care for the children and families we serve. We hope these days in Dubai leave you inspired, connected, and re-energized for the work ahead.

Welcome to MEPOS 2025!

Warm regards,

WORKSHOP: PAEDIATRIC UPPER LIMB SPLINTING FOR CONGENITAL AND TRAUMATIC CONDITIONS

AMY LAKE

LINDSAY WILLIAMS

SARAH ARMITRAGE

**KEY LEARNING OBJECTIVES**

By the end of this workshop, Participants will be able to:

1. Identify the key congenital hand diagnoses and their implications for splinting
2. Understand selected trauma-related hand injuries and appropriate splinting protocols
3. Create patterns for 6 common splints used in Paediatric Hand Therapy
4. Fabricate at least 2 splints during Hands-on Sessions
5. Apply clinical reasoning to select appropriate splints based on diagnosis and functional goals
6. Access to take-home resources, including splinting videos and pattern templates

MATERIAL INCLUDED

- Splinting pattern templates for 6 splints
- Access to instructional videos for each splint
- Handouts summarising diagnosis-specific splinting strategies

08:30 – 13:00

SESSION 1

08:30 – 10:10

Didactic Session: Congenital Diagnosis and Splinting Overview:

- Syndactyly: post op care, scar management, splinting needs
- Amniotic Band Sequence: ADL adaptations, splinting considerations
- Radial Dysplasia: thumb hypoplasia, pollicization, opponensplasty
- Arthrogryposis: splinting strategies, surgical implications

10:15 – 10:30

COFFEE BREAK

10:30 – 11:00

Splints Discussed:

- Resting hand
- Thumb spica
- Elbow flexion

11:00 – 13:00

Hands-on Splinting Congenital Cases:

- Participants choose and fabricate one congenital-related splint discussed
- Guided pattern creation and fabrication

13:00 – 14:00

LUNCH

14:00 – 18:00

SESSION 2

14:00 – 16:00

Didactic Session: Trauma Diagnosis and Splinting Overview:

- Flexor Tendon Injuries: dorsal blocking splints, protocols
- Finger fractures: mallet finger splints, thumb UCL/RCL sprains

Splints discussed:

- Dorsal blocking
- Mallet finger

16:00 – 16:15

COFFEE BREAK

16:15 – 17:15

Hands-on splinting Trauma Cases:

- Participants choose and fabricate one trauma-related splint discussed
- Guided pattern creation and fabrication

17:15 – 18:00

Demo AND Discussion:

- "Serial Casting" for congenital elbow contractures: techniques, indications, and therapist role
- Question and Answers & Wrap-up

18:15 – 19:15
